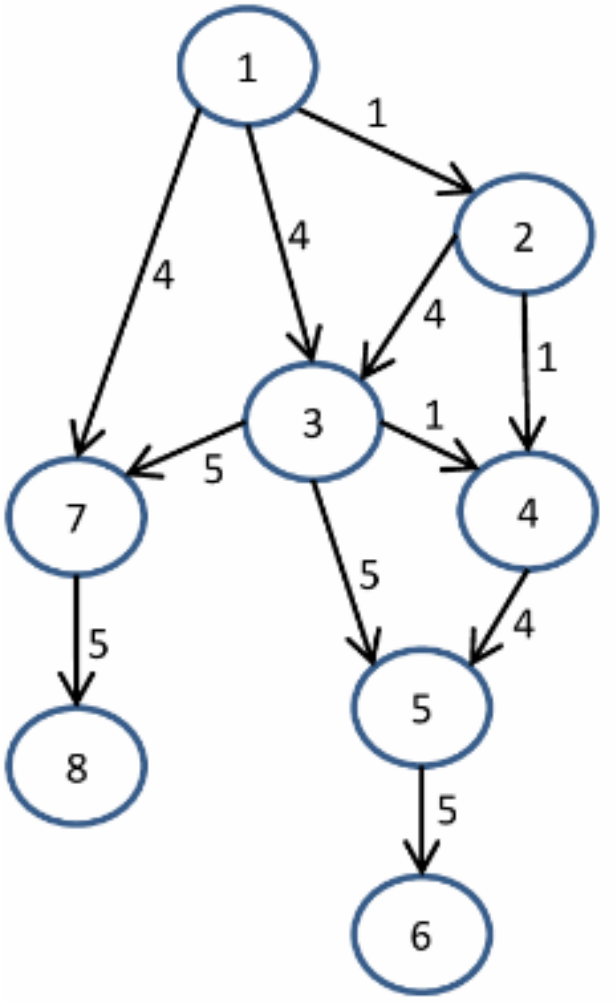

Graph 21

Start: 1 | Ascending neighbors | Directed

BFS: 1, 2, 3, 7, 4, 5, 8, 6

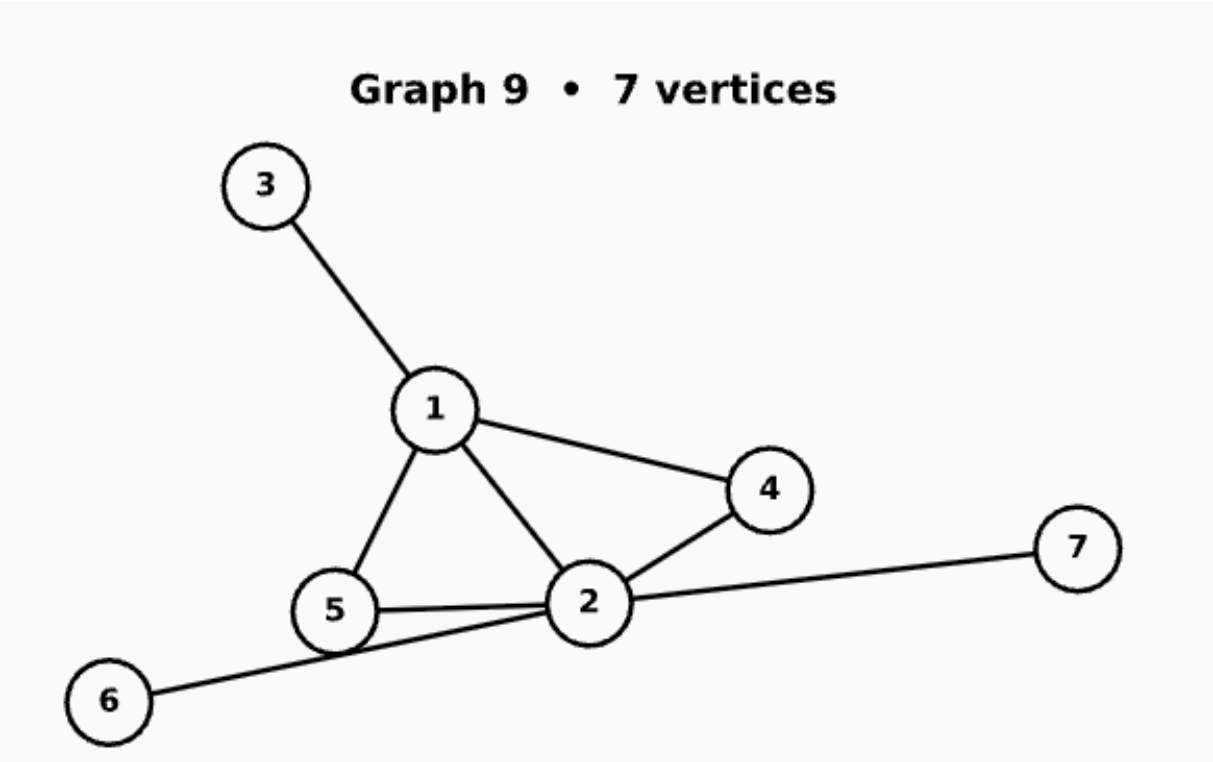

DFS: 1, 2, 3, 4, 5, 6, 7, 8

Original graph from the supplied PDF; traversal orders calculated independently.

Virtual Lab: custom graph entry is not supported in the inspected interfaces.
No simulator traversal screenshots are available for this assignment graph.

Graph 9

Start: 1 | Ascending neighbors | Undirected

BFS: 1, 2, 3, 4, 5, 6, 7

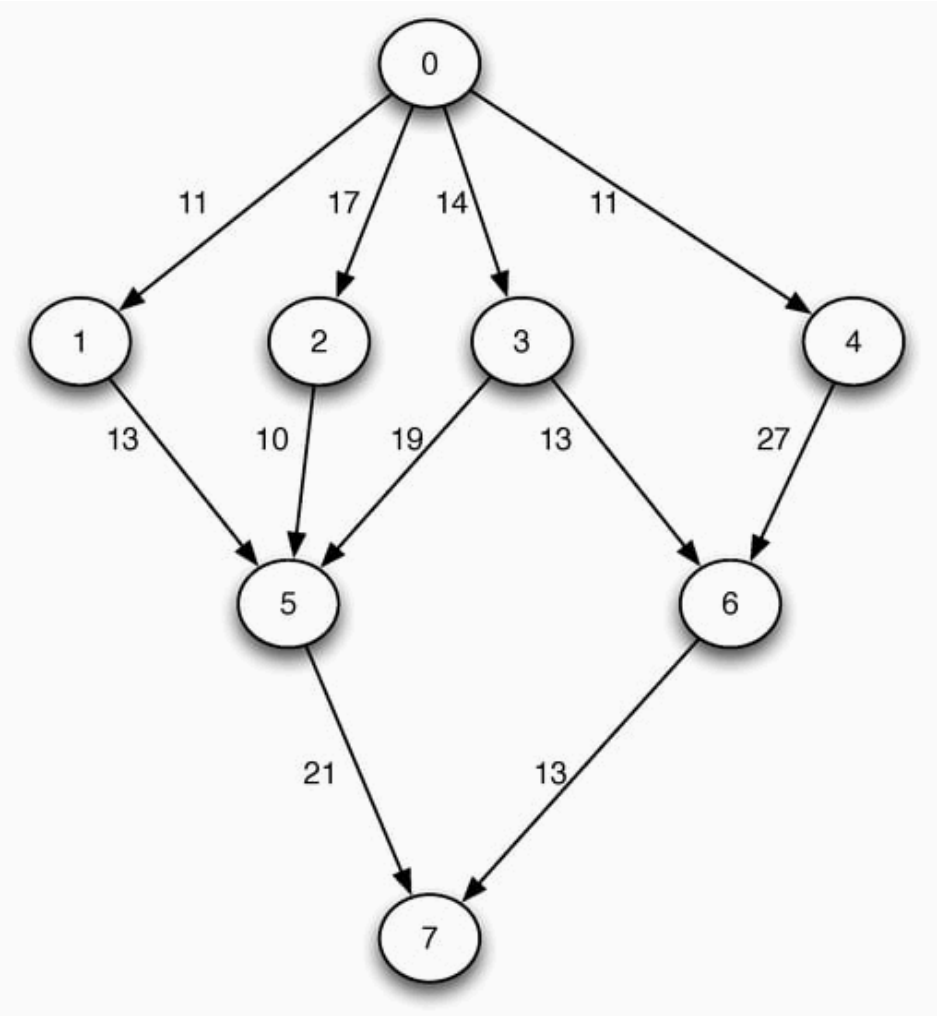

DFS: 1, 2, 4, 5, 6, 7, 3

Original graph from the supplied PDF; traversal orders calculated independently.

Virtual Lab: custom graph entry is not supported in the inspected interfaces.
No simulator traversal screenshots are available for this assignment graph.

Graph 20

Start: 0 | Ascending neighbors | Directed

BFS: 0, 1, 2, 3, 4, 5, 6, 7

DFS: 0, 1, 5, 7, 2, 3, 6, 4

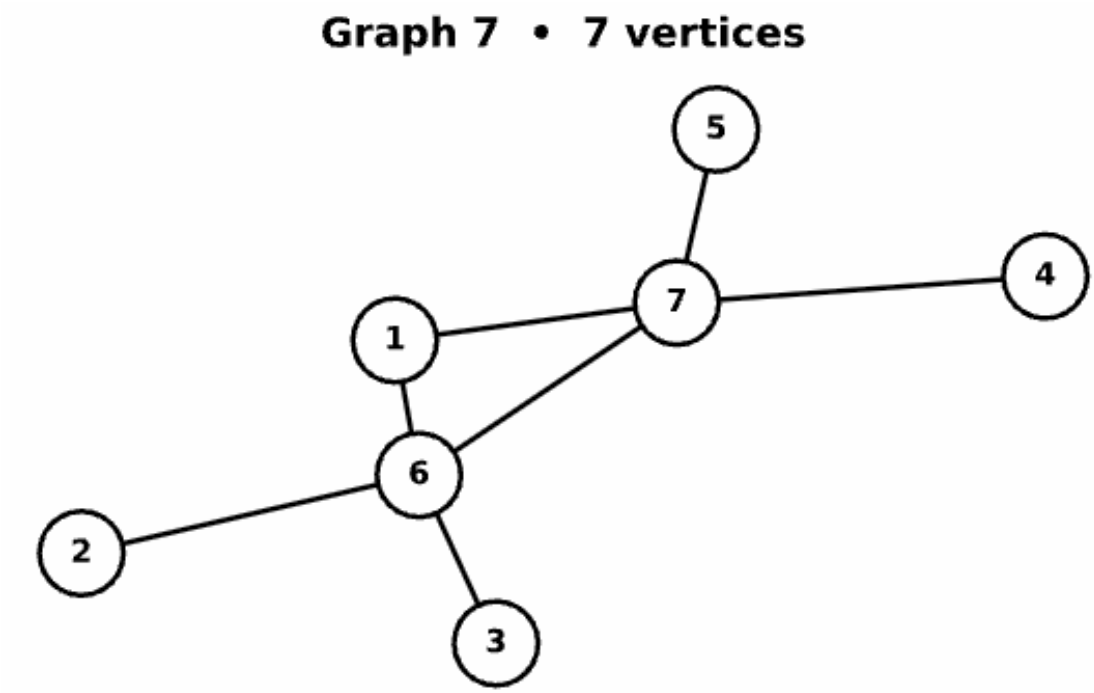

Original graph from the supplied PDF; traversal orders calculated independently.

Virtual Lab: custom graph entry is not supported in the inspected interfaces.
No simulator traversal screenshots are available for this assignment graph.

Corrected DFS: vertex 7 is visited immediately after 5 via edge 5 -> 7.
Edge weights do not affect BFS/DFS neighbor order.

Graph 7

Start: 1 | Ascending neighbors | Undirected

BFS: 1, 6, 7, 2, 3, 4, 5

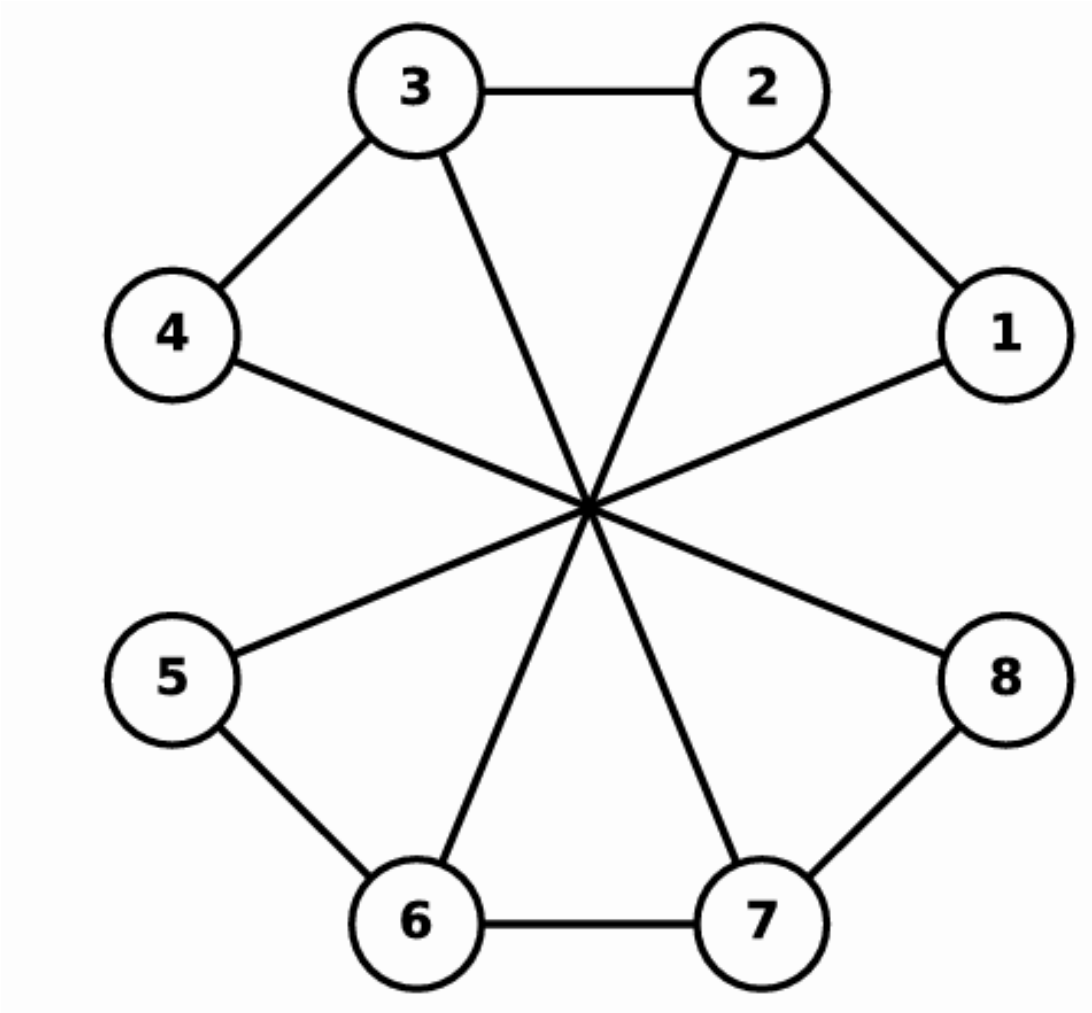

DFS: 1, 6, 2, 3, 7, 4, 5

Original graph from the supplied PDF; traversal orders calculated independently.

Virtual Lab: custom graph entry is not supported in the inspected interfaces.
No simulator traversal screenshots are available for this assignment graph.

Graph 2

Start: 1 | Ascending neighbors | Undirected

BFS: 1, 2, 5, 3, 6, 4, 7, 8

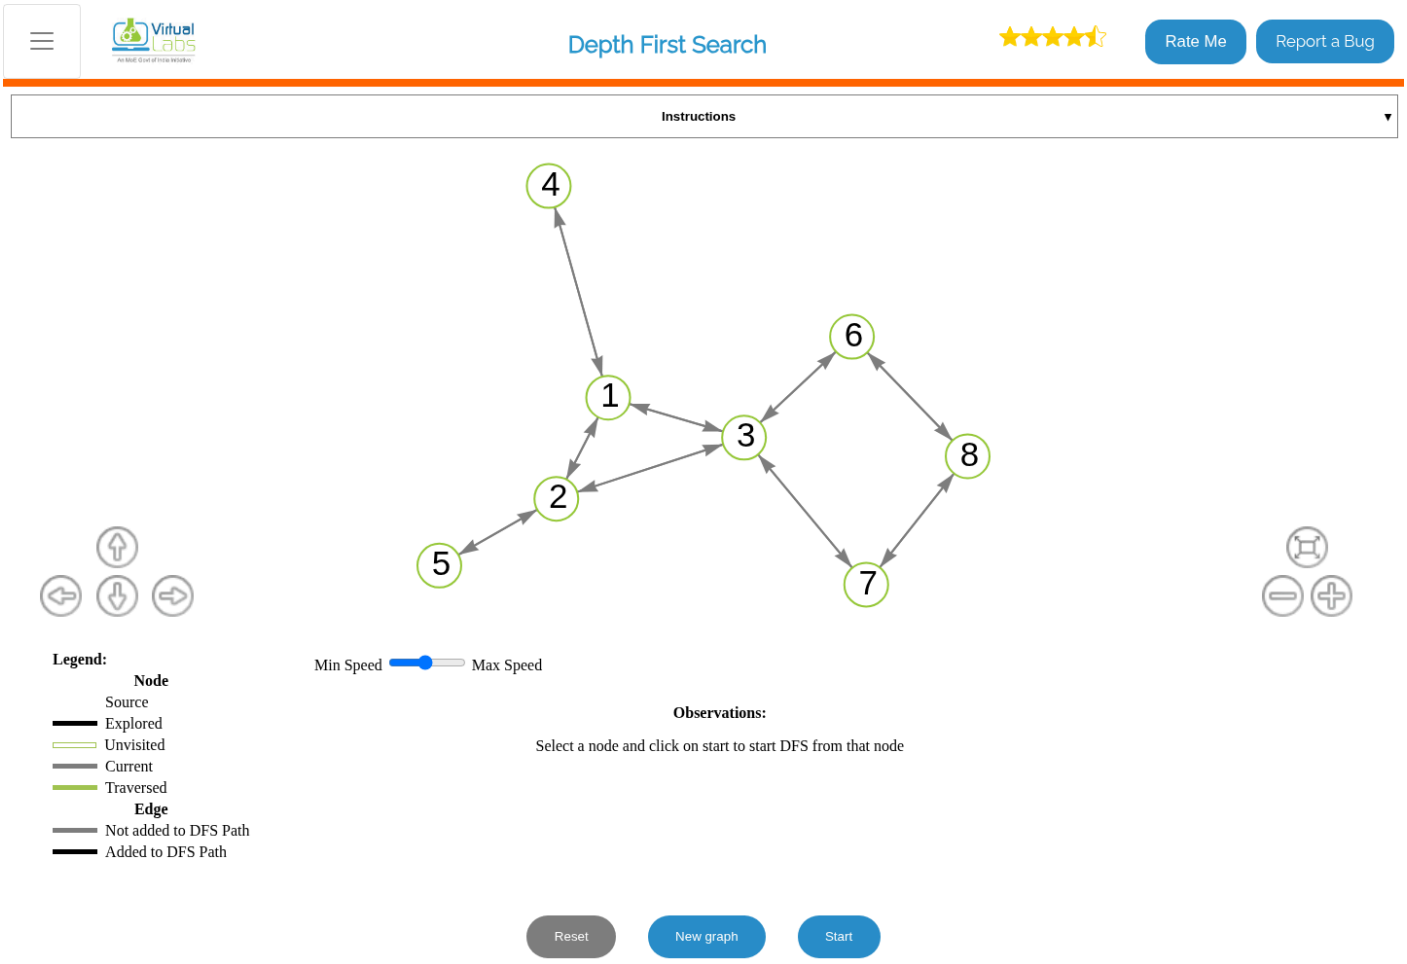

DFS: 1, 2, 3, 4, 8, 7, 6, 5

Original graph from the supplied PDF; traversal orders calculated independently.

Virtual Lab: custom graph entry is not supported in the inspected interfaces.
No simulator traversal screenshots are available for this assignment graph.

Virtual Lab inspection

Demo, Practice and Exercise provide preset/random graphs, source selection and traversal controls. No graph import, edge editor, or adjacency-order input is exposed. "New graph" reloads the Demo; its graph data is hardcoded.

Authentic Playwright screenshot of the live Demo interface.
The displayed lab graph is different from the five assignment graphs.
This screenshot is interface evidence only, not assignment traversal evidence.
